

You Said – We Did

A big thank you to those who took the time to provide us with feedback in our recent survey. As a result of your feedback, we have made the following changes to our website.

Address verification

When adding a new client, the street address will be verified by NZ Post address verification, to reduce postal address errors.

Client order load speed

The back-end function to load a Clients scheduled order has been optimized to improve loading speed. We think this will make a noticeable difference initially, however, please note that as this data is pulled in real time, it won't be instantaneous loading speed due to the volume of the data required to pull.

Stock Status on order schedule

Products flagged as 'supplier out of stock' in SAP will show a message in the client order page.
